exhibit 3

Also in addition the IRS 990 for the reporting year 2009 shows a 300% increase in revenue under convention revenue on page 9. I inquired why we went from 80K in past years to 255K that year and I am ignored. The current year is also back down to 80K or less. It is like 170k was sitting somewhere unreported or missing and reimbursed. a board member was expelled Dec 5, 2011 for violating a bylaw of "impugning" the association regarding the handling of finances. I know I am in the target of this group for expulsion too because I am republishing these public records at <http://www.randyscott.us/20th/board/napps.html> . In addition the association recently spent 100K to defeat NY city legislation of which the result was to reduce the supply of process servers from 1800 to 500 and create a supply windfall to many influential members. Another website speaks about specifics collusion and specific instances of market control by board members at <http://www.nappswatcher.com>. I know it sound like a beef but I don't have the money to fight them for disclosure in the court all I have is to hope regulators review. A National Association of Process servers has a profound impact on legal issues, and should tread carefully on chilling competitive market places across the country. I have also sent a copy of this to the US DOJ for review on the issue associated with controlling a competitive marketplace and pecuniary gain of some members and associates.
